**Vintage report**  
Year of abundant birth of new shoots, with dry weather during the flowering period, resulting in relatively high productivity. The entire period of growth, until harvest, was extremely dry, which affected the photosynthesis in the vines, including interruptions of maturation. This resulted in small bunches, giving concentrated and aromatic whites, and structured, densely coloured reds.

**Tasting notes**  
This wine reflects above all the altitude and the granitic soil of our vineyards. It reveals the typical balance of cool climate wines, with abundant minerality and finesse. In the mouth it shows delicacy and amplitude, and its acidity provides its vivid freshness, and an exceptional potential for graceful aging.

**Vinification and aging**  
Fermented in second and third year barrels, and aged afterwards over fine lees with battónage, during 6 months.

**Serving suggestions**  
Best served at a temperature between 9 and 12°C.
